SUMMARY

Full-stack product engineer specializing in TypeScript, Next.js, and AWS with 4+ years building production web applications from concept through deployment. Proven track record delivering business-critical systems for inventory, ordering, reporting, and operational workflows used daily by operations teams. Strong product mindset with experience designing scalable solutions directly with stakeholders and shipping features end-to-end.

TECH STACK

TypeScript, JavaScript • React, Next.js, Tailwind CSS • Node.js, REST APIs, Authentication
AWS (Amplify, Lambda, S3, SES, CloudFront, Route53) • MongoDB, Prisma, PostgreSQL • Git, CI/CD

PROFESSIONAL EXPERIENCE

Dovi's Food Service — Product Engineer / Technical Manager, New York, NY   Jan 2025 – Jan 2026

- Designed and built full-stack operations platform for inventory, vendor ordering, and reporting using **Next.js, TypeScript, MongoDB, Prisma, and AWS**
- Replaced Excel workflows with centralized production system used daily across two locations, supporting **15–25 weekly vendor orders (~$3M annual purchasing volume)**
- Automated reporting and inventory tracking, improving data consistency, reducing errors, and saving staff hours each week
- Owned full lifecycle: requirements, database schema design, development, AWS deployment, and ongoing production support
- Leading migration to company AWS environment to improve security, scalability, and maintainability

The Glimpse Group — Full Stack Engineer, New York, NY (Hybrid)   Jun 2022 – Oct 2023

- Developed production web applications and marketing systems using **Next.js, React, and TypeScript**
- Integrated CMS, CRM APIs, and analytics tools for global marketing workflows
- Maintained AWS deployments and CI/CD pipelines
- Delivered frontend and analytics features contributing to **~40% conversion improvement**
- Worked within multi-developer team while owning features end-to-end

Subway Realty Group — Office Manager / Webmaster, New York, NY   Oct 2013 – Jun 2019

- Built company website and online tenant application system with database and automated workflows
- Created CRM dashboards and managed digital branding supporting 12-agent team
- Supported operations contributing to 250+ annual rentals (~$700K revenue)

SELECTED PROJECTS

EZ Food Service Platform — Full-stack SaaS-style system for menus, vendors, ordering, and inventory

EZFoodService.io • Next.js • TypeScript • Prisma • MongoDB • AWS

- Designed scalable multi-location data model and operational workflows used in production operations
- Built production UI, APIs, and deployment infrastructure

Goldylocks Rental Tools — Real-estate workflow application built end-to-end

Goldylocks.io • Next.js • Tailwind • NextAuth • MongoDB • AWS

- Built full-stack application to streamline rental workflows, applications, and property tracking
- Implemented authentication, database schema, and AWS deployment for a production-ready system
